

# About “Tokyo My Timeline Creation Navigator” and “Tokyo Virtual Hazard – Flood and Storm Damage”

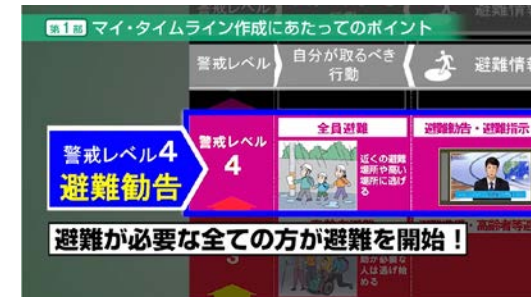

## About the videos

### Tokyo My Timeline Creation Navigator

○Using information from the My Timeline Creation Guidebook, learn how to make your timeline and the basics about flood and storm damage.

※Tokyo My Timeline aims to help Tokyo residents understand what to do during a disaster with consideration to their local area’s features. It collects resources to help you learn about how to evacuate flood disasters, and can be found on the Tokyo Disaster Prevention Homepage.

- Part 1: Useful information when making your Timeline
- Part 2: Learn more about the risks in particular areas
  - Areas that may be affected by the Arakawa, Edogawa or Tone rivers flooding
  - Areas that may be affected by the Tamagawa river flooding
  - Areas that may be affected by other smaller rivers flooding
- Part 3: Make your Timeline

Part 1: Useful information when making your Timeline

Part 3: Make your Timeline

## 「TOKYO VIRTUAL HAZARD – Flood and Storm Damage」

○A VR video that gives you an experience of the threat flood and storm damage pose, along with demonstrating the importance of early evacuation. It promotes good preparation for flood disasters through “My Timeline” and other measures.

○Covers disasters including landslides and flooding (from rivers and from high sea-levels)

Experience the above disasters in VR and learn what to do if they happen

## Release date

Available on Tokyo Douga, YouTube and the Tokyo Disaster Prevention Homepage from **June 10, 2020**.
